SKILLS

- **Languages:** Python, Java, MERN Stack
- **Frameworks/Tools:** Scikit-learn, PyTorch, Keras, TensorFlow, Pandas, NumPy, Matplotlib, OpenCV
- **Data & Cloud:** MySQL, MongoDB, Power BI, Google Colab, AWS (basic)
- **Soft Skills:** Problem-Solving Skills, Team Player, Project Management, Adaptability

INTERNSHIP

- Outlier – Generative AI Training Company** December'24 – June'25
- ~Generative AI Trainer-Freelance
 - Evaluated and optimized large language model outputs for sensitive content detection, improving consistency and contextual accuracy across multiple programming languages.
 - Utilized Python, Java, C++, and JavaScript for prompt creation, testing, and analysis.

PROJECTS

- Movify: AI-Powered Full-Stack Movie Platform** | React, Node.js, Express.js, MongoDB, LLM APIs June'25 – August'25
- Engineered a scalable RESTful API using Node.js and Express.js to manage user authentication, movie data, and CRUD operations for reviews.
 - Integrated a Large Language Model (LLM) to deliver intelligent features, including a personalized recommendation engine and automatic review summarization.
 - Developed a dynamic and responsive user interface with React, implementing component-based architecture and state management for a seamless user experience.
 - GitHub Repository: [Movify Project](#)

- Ship Detection in Satellite Imagery Using Deep Learning** | YOLOv3, OpenCV March'25 – April'25
- Pre-processed maritime satellite images, followed by image normalization and bounding box extraction processes.
 - Developed a YOLOv3 Convolutional Neural Network (CNN) model for high-accuracy ship localization in satellite imagery.
 - Achieved ~95% Training Accuracy and ~92% Validation Accuracy
 - GitHub Repository: [Ship Detection Project](#)

- Customer Behavior Analytics – For Retail Stores** | K-Means Clustering, RFM Analysis June'24 – July'24
- Applied RFM (Recency, Frequency, Monetary) analysis, K-Means clustering to segment customers into five distinct groups
 - Determined optimal K using elbow method (WCSS) and visualized segments via scatter plots.
 - Generated actionable business insights to target high-value customers and improve marketing ROI
 - GitHub Repository: [Customer Behavior Analytics Project](#)

CERTIFICATES

- Machine Learning Specialization by Stanford | Online and DeepLearning.AI-Coursera July 2025
- Generative AI with Large Language Models by Coursera. October 2023
- Dynamic Programming, Greedy Algorithms by University of Colorado Boulder October 2023
- Google Cybersecurity (Google) August 2022

EDUCATION

- **Lovely Professional University** Punjab, India
Bachelor of Technology - Computer Science and Engineering; **CGPA: 7** October 2022 - Present
- **Narayana Junior College** Hyderabad, Telangana
Intermediate; **Percentage: 78.9%** April 2020 - March 2022
- **Sri Chaitanya Techno School** Hyderabad, Telangana
Matriculation; **Percentage: 100%** April 2019 - March 2020
